

PRESS RELEASE: NEW PRODUCT RELEASE

DATE: Monday, June 15, 2006

FOR IMMEDIATE RELEASE

OSOD™ - Online Sex Offender Database™, is a web-based database solution for law enforcement agencies that meets all of the local, state and federal requirements for the display of registered Sex Offender data to the public including automatic notification of updates.

OSOD™ has been operating at the Oconee County Sheriff's Office in Watkinsville GA since January 2005. OSOD™ has allowed the agency to quickly and easily provide a website that displays an accurate and timely representation to the public of the local Sex Offender population within their jurisdiction. OSOD™ provides automatic email notification of database updates to anyone wishing to submit an email address. Most important, TerraVision's OSOD™ only requires one person to easily maintain the database and perform all of the notification tasks via any Internet connection available to them.

Sheriff Scott Berry of the Oconee County Sheriff's Office states, "In creating OSOD™ TerraVision Inc has made a much needed resource available to all levels of law enforcement at a cost any agency can afford." "OSOD™ has been an invaluable tool in providing timely and accurate Sex Offender registration data and notifications to the citizens of Oconee County and does an excellent job of promoting the visibility of registered sex offenders in their local communities."

OSOD™ is currently the only "tested and proven" solution available that allows all of Georgia's Sheriffs to become immediately compliant with the update to the Sex Offender law that goes into effect July 1, 2006 as described in Georgia Senate Bill 1059. At that time, in addition to other changes in the law, all Sheriffs in Georgia will be required to maintain a local website of Sex Offenders registered in their County and provide timely notifications of all registered Sex Offender information and updates to numerous locations throughout their respective County.
